

ERWIN WILSON CENIZA

SOFTWARE DEVELOPER (FULL STACK)

✉ ERWINWILSONCENIZA@GMAIL.COM

☎ +639351228470

📍 CANDUMAN, MANDAUE CITY, CEBU

- Full-Stack Developer with 10+ years building enterprise ERP and LOB applications from the ground up.
- Backend focus on [ASP.NET](#) Core, C#, PostgreSQL, and SQL Server, designed for scale and real-world use.
- Frontend work spans WPF (MVVM) for desktop and modern web/mobile stacks.
- Led full product lifecycles on commercial FMIS and cloud-native HRIS platforms.
- Built solutions that actually got used, high adoption rates across regional SMB markets.

AWARDS

Award of Excellence

DEC 2024

Accountmate Corporation

Recognized for outstanding contribution to the core platform.

Service Award

DEC 2023

AccountMate Corporation

5 Years Service

SKILLS

- C# ASP.NET Core, Blazor & MVC ^{L5}
- Entity Framework + LINQ + Dapper ^{L5}
- WPF, .Net MAUI and Windows Forms ^{L5}
- SQL Server, PostGres, MongoDB, MySQL, Sqlite ^{L5}
- React + TypeScript ^{L4}
- Angular + TypeScript ^{L4}
- Node.js & Express ^{L4}
- Github, Azure DevOps & Azure CICD ^{L4}
- SOLID, CQRS Clean Architecture, OOP & MVVM Patterns ^{L4}
- Multithreading, Asynchronous & Concurrency Programming ^{L4}
- HTML5, JQuery, CSS3, Bootstrap & TailwindCSS ^{L4}
- Telerik, DevExpress & Syncfusion ^{L4}
- GraphQL, Apollo Federation, Hot Chocolate, Elastic Search, SignalR, Microsoft Graph ApPI ^{L4}
- Gemini AI Development ^{L5}

EXPERIENCE

Software Developer

NOVEMBER 2025 – PRESENT

Eclaro Business Solution

- Integrated Microsoft Graph API for provider scheduling and reassignments, which fixed scheduling conflicts and dropped our incoming bug tickets and backend backlog.
- Built an Azure blob storage vault and used Azurite so the team could test everything locally instead of relying on the cloud.
- Created a rule-based script generator using address, zip, and state data to instantly personalize outreach scripts for users.
- Developed frontend modules for patient assessments along with live graphical tracking for vitals.
- Implemented OData endpoints to handle massive data fetches, speeding up query response times while keeping data integrity intact.
- Handled automated testing using xUnit/bUnit and Postman, keeping the database in sync via EF Core migrations and seed data.
- Participated in code reviews and daily Agile meetings to keep feature work moving forward.

Software Developer

SEPTEMBER 2018 – MAY 2025

AccountMate Corporation

Contributed to the Development of their flagship ERP platform using WPF, XAML, and MVVM. Developed modular systems via Mediator/MEF and run through all development life cycles using Azure DevOps CI/CD pipelines.

- **WIP Module Optimization:** Engineered a high-performance manufacturing module using Telerik UI; optimized data operations with LINQ to Entities to accelerate reporting and tracking accuracy.
- **Reporting & BI:** Designed SSRS-based reports and deployed an automated back-end distribution service, streamlining operational insights for stakeholders.
- **Advanced Feature Engineering:** Developed an Advance Billing module for revenue optimization, integrated Aatrix for 1099 tax compliance, and built a real-time Zip Code API for address validation.
- **DevOps:** Standardized Azure DevOps workflows, utilizing Git and automated CI/CD pipelines to ensure frequent, reliable, and high-quality deployments.

Lead System Developer

NOVEMBER 2016 – SEPTEMBER 2018

Technologic Solutions

Drove the company's technical vision and spearheaded the end-to-end development, implementation, and maintenance of a suite of commercial software products, currently utilized by local businesses. Products included: Cloud FMIS (Financial Management), Cloud HRIS (Human Resources & Payroll), Loan Management, Real Estate Development (ongoing at the time), Point of Sale (POS), and Warehouse Management.

- Led hands-on product development utilizing optimal technologies and modern development practices.
- Defined product roadmaps, evaluated feature suggestions, and made key architectural and functionality decisions.
- Managed and maintained the company's source code repositories and version control using GitHub.
- *Detailed portfolio showcasing these developed products, including video demonstrations and technical descriptions, is available at: <https://erwinwilsonceniza.qzz.io>*

Software Developer/RND

APRIL 2011 – MARCH 2015

Innosoft Solutions Inc.

Rapidly promoted from client support to R&D, specializing in mobile and cloud innovation.

- Promoted from client support to R&D to help transition the company's desktop application into cloud-based services (including POS, financial, and HR systems).
- Divided and rebuilt legacy applications by breaking down old desktop code and rebasing it into separate cloud service layers.
- Sped up product development timelines by replacing the old monolithic code with clean, modular cloud workflows.

PROJECTS

Cloud HRIS

[github.com/ewceniza9809/litestaff](#)

HRIS & Payroll Management System | [Demo](#) | [Video](#)

- Engineered end-to-end HRIS/Payroll platform automating complex compliance, overtime, and holiday calculations.
- Developed Xamarin/MAUI self-service portal for real-time payslip access, DTR tracking, and automated leave management.
- Built AI HR Assistant delivering real-time performance forecasting and automated data visualization.
- Integrated FaceNet facial recognition and location-fenced biometric security via ASP.NET Core.

Halkyone Clinical OS

[github.com/ewceniza9809/emr](#)

Halkyone Clinical OS - Enterprise EMR | [Demo Site](#) | [Video Demo](#)

Architected a high-availability, multi-tenant clinical OS using .NET 9, Clean Architecture, and CQRS to support high-density medical workflows and transactional consistency.

- **Triple-Portal Architecture:** Deployed a unified ecosystem featuring a Next.js clinical engine, administrative portal, and native mobile PWA (Ionic) for field operations.
- **GraphQL Performance:** Eliminated N+1 latency by implementing HotChocolate DataLoaders, optimizing retrieval for complex healthcare datasets.
- **Data Synchronization:** Guaranteed integrity between PostgreSQL and Elasticsearch via Outbox patterns and event streaming.
- **Geospatial Intelligence:** Developed a spatial analytics module for automated clinician routing and coordinate tracking.
- **Assessment Engine:** Built a dynamic runtime for standardized medical forms (ESAS-R, PHQ-9) with automated Markdown and QuestPDF report generation.

Tech Stack: .NET 9, HotChocolate GraphQL, EF Core, PostgreSQL, Elasticsearch, MediatR, SignalR, Next.js 14, Apollo, Tailwind, SurveyJS, Ionic 8, React 18, Capacitor, SQLite.

Cloud CRM

[nex-point.vercel.app/](#)

- Built a CRM from scratch using [ASP.NET](#) Core and React/TypeScript.
- Developed features to automate lead capture, sales pipelines, SLA support tracking, and team analytics.

Cloud 3PL (Cold Storage)

[github.com/ewceniza9809/cloudpallet](#)

- Built a full-stack WMS from scratch for cold chain and 3PL operations.
- Tech Stack: [ASP.NET](#) Core (CQRS, Clean Architecture) & Angular (Material Design).

Cloud FMIS

[www.youtube.com/watch?v=Jg8Ilwvqjag&t=898s](#)

- Built a cloud-based FMIS from scratch tailored for trading and manufacturing firms.
- Designed and developed the system to automate financial operations, prevent data errors, and handle reporting.

Others

Loan Management using Blazor, POS using Google Flutter, and Web Real Estate Management using [ASP.Net](#) Core and MetronicUI
